OSCAR CRESCENTE

Product Engineer | Mobile, Full-Stack, AI Automation & Product Design

hola@crescente.dev | +58 412-678-5596 | Remote, Venezuela | English C1 / Spanish Native
Portfolio: crescente.dev | Agency: ultramare.dev | GitHub: github.com/oscarmiranda90

PROFESSIONAL SUMMARY

Product Engineer with 5+ years shipping digital products end-to-end and 4 years specializing in Flutter mobile development, across product strategy, UX/UI, mobile, backend, real-time systems, AI automation, and deployment. Brings 15+ years of visual design and branding experience plus nearly a decade leading product and commercial operations in a hematology reagents company.

CORE SKILLS

Mobile (Flutter, 4 years): Flutter, Dart, React Native, Expo

Frontend: React, Next.js, Three.js

Backend & Cloud: TypeScript, Node.js, Supabase, Firebase, Cloudflare Workers, Durable Objects, R2, WebSockets, REST APIs

AI & Agents: OpenAI, Claude, Gemini, Hermes, MCP, Agent Harnesses, Multi-Agent Systems, Tool Calling, ElevenLabs

Product & Design: Product Engineering, UX/UI, Figma, Design Systems, Branding, Packaging

Architecture: BLoC, Riverpod, Offline-First, Deterministic Simulation, CI/CD

EXPERIENCE

Founder & Product Engineer 2023 - Present | Remote

Ultramare.dev, Software Development & Automation Agency

- Design, build, and launch mobile, web, and automation products from product definition and UX/UI through engineering, cloud deployment, analytics, and iteration.
- Built an AI Content Factory using 6 specialized agents with agent harnesses, role-based model routing, MCP-compatible tool workflows, Hermes orchestration, ElevenLabs voice generation, deterministic media libraries, HTML captions, and Hyperframes rendering.

General Manager & Product Lead 2016 - 2026 | Venezuela

Doug Soluciones, C.A., Hematology Reagents Company

- Led operations and commercial strategy for an established hematology reagents company, including nationally manufactured products, packaging, pricing, sales model, suppliers, inventory, clients, and go-to-market execution.
- Directed brand and product presentation across packaging, marketing materials, website, sales collateral, and customer-facing communication.

Independent Designer & Digital Product Freelancer 2009 - 2023 | Venezuela / Remote

- 15+ years creating posters, stickers, brand identities, packaging, websites, interfaces, prototypes, and digital products directly for clients from concept through launch.

SELECTED PRODUCTS

Mythika, Puzzle Tournament | Published on App Store Flutter | Dart | BLoC | Supabase | Durable Objects | R2 | WebSockets

- Designed and built a production real-time puzzle-battle game for iOS with competitive battles, 9 playable gods across 3 pantheons, character abilities, mana systems, RPG-style progression, a 25-level campaign, VS CPU, infinite mode, and daily challenges.
- Architected the product with Flutter/BLoC, Supabase-backed player systems, Cloudflare Durable Objects for real-time multiplayer services and match coordination, WebSockets for live sessions, and R2 for scalable asset storage.

RepSet, Open-Source Fitness Product Flutter | Firebase | Gemini | Hive | iOS / Android

- Built and published an open-source fitness product with a paid version, AI workout tools, analytics, offline-first sync, and a structured library of 500+ exercises.

TuTurno, Product UI Redesign React Native | Expo | Three.js | Figma

- Redesigned and implemented the interface of TuTurno, an established Venezuelan application with 50K+ users, spanning UX/UI, reusable components, Expo, React Native, and Three.js interactive elements.
