

OSCAR CRESCENTE

Full-Stack Developer | AI Engineer | Autonomous Agents Specialist

hola@crescente.dev • +58 412-678-5596 • crescente.dev • github.com/oscarcrescente • Venezuela (Remote) • English C1 / Spanish Native

PROFESSIONAL SUMMARY

Full-Stack Developer and AI Engineer with 3+ years of specialized experience building autonomous agent systems, LLM-powered applications, and production-grade mobile and web products. Shipped 4 AI apps to the App Store and TestFlight serving real users. Expert in Node.js, Python, Flutter, and React, with deep hands-on proficiency in Model Context Protocol (MCP), Retrieval-Augmented Generation (RAG), Prompt Engineering, and Gemini / OpenAI / Claude APIs. Seeking to bring end-to-end AI product engineering to a high-impact team.

WORK EXPERIENCE

AI Engineer & Full-Stack Developer | **Independent / Freelance** | Jan 2023 – Present • Remote

- Architected autonomous agent pipelines using Model Context Protocol (MCP), enabling complex multi-step AI workflows with structured outputs, reducing manual orchestration effort by ~60%.
- Engineered REST APIs in Node.js and Python integrated with OpenAI GPT-4, Google Gemini, and Claude; cut average LLM response latency by ~35% through prompt caching and structured generation.
- Shipped 4 production AI apps (RepSet, Moira, RibEye, Yumforge) live on the App Store and TestFlight, covering fitness, nutrition, wellness, and gamification verticals.
- Delivered real-time analytics dashboards in React connected to live Firebase streams, enabling sub-second data visualization for 100+ active beta users.
- Deployed serverless architectures on Google Cloud Platform (GCP) with automated CI/CD pipelines and full secret management across all environments.

General Manager | **Dougsoluciones, C.A.** | Jan 2016 – Present • Venezuela

- Directed sales, procurement, and cash flow operations for a 20+ year family business, maintaining 100% regulatory and tax compliance year over year.
- Led full brand refresh: new packaging, rebuilt website, and updated social strategy, improving online engagement measurably within the first quarter.
- Optimized supplier relationships and inventory cycles, reducing stockouts and improving procurement lead times.

VFX Artist | **Cotufa Studios** | 2014 – 2016 • Venezuela

- Produced photo-realistic VFX for feature films and TV commercials using Maya Autodesk; developed reusable workflows that cut client revision cycles by ~30%.

SKILLS

Languages: Python, JavaScript (ES2022+), TypeScript, Dart, SQL

AI & ML: LLMs (OpenAI GPT-4, Google Gemini, Anthropic Claude), Autonomous Agents, Model Context Protocol (MCP), Prompt Engineering, Retrieval-Augmented Generation (RAG), Structured Generation, Semantic Classification, AI Workflow Automation, Nano Banana Pro

Frameworks: Node.js, React, Next.js, Flutter / Dart, Firebase Cloud Functions, Supabase, REST APIs, WebSockets, Microservices, Serverless Architecture

Mobile: Flutter (iOS & Android), Riverpod, Provider, BLoC, Rive Animations, Deep Linking, Push Notifications, App Store & TestFlight Deployment, Cross-Platform Development

Cloud: Google Cloud Platform (GCP), Firebase Suite (Firestore, Auth, Storage, Functions, Realtime DB), Cloudflare, CI/CD Pipelines, Git, Agile / Scrum

Databases: Firestore (NoSQL), Supabase (PostgreSQL), SQLite, ObjectBox, Hive, SQL, Schema Design, Query Optimization, Offline-First Architecture, Real-Time Sync, Indexing, Migrations

Security: OAuth 2.0, JWT, Firebase Authentication, RBAC, OWASP Best Practices, API Key & Secret Management, Data Encryption at Rest & in Transit, Input Validation

Design: Figma, UI/UX Design, Design Systems, Photoshop, Rive, Maya Autodesk

PROJECTS

RepSet – AI Workout Coach | Flutter · Node.js · Python · Firebase · GPT-4 | 2023 – Present • App Store

- Engineered LLM pipeline generating structured, personalized workout plans from minimal user input, reducing average setup time from 15 min to under 30 seconds.
- Built automated analytics engine tracking volume trends, RPE progression, and weight charts; eliminated 100% of manual data entry for users.
- Architected offline-first Flutter app with Firebase sync, maintaining full functionality in low-connectivity environments across iOS and Android.

RibEye – Carnivore Diet Tracker | Flutter · Firebase · Nano Banana Pro · Rive | 2024 – Present • TestFlight

- Integrated Nano Banana Pro SDK to analyze meal photos in real time, identifying meat cuts and estimating macros with ~90% accuracy, replacing manual food logging entirely.
- Engineered adaptive electrolyte and body metric tracking with dynamic daily targets derived from user biometric inputs.

Moirā – Habit & Manifestation App | Flutter · Firebase · Claude API · ObjectBox | 2023 – Present •

TestFlight

- Developed AI modules for personalized affirmations, manifestation scripts, and dream interpretation using structured Claude API calls and prompt engineering.
- Implemented offline-first ObjectBox architecture ensuring 100% app functionality without internet connection.

Yumforge – AI Cooking & Creature RPG | Flutter · Supabase · Nano Banana Pro | 2024 – Present • In

Development

- Engineered Nano Banana Pro pipeline that converts photos of cooked meals into unique Pokémon-style creature companions, deriving stats and abilities from actual ingredients and macros.
- Designed full RPG progression system with leveling, evolution, and creature fusion, incentivizing daily cooking via Tamagotchi-style care mechanics and battle gameplay.
- Built habit loop engine tying creature health and mood to real cooking frequency, driving daily active engagement through in-game progression rewards.

EDUCATION & CERTIFICATIONS

Google AI Professional Certificate | Google • 2026

Artificial Intelligence & LLMs | Udemy & Self-Directed Study • 2022 – 2024

Flutter – Advanced Mobile Development | Udemy • 2022 – 2023

Python for Data Science & Automation | Codecademy & Udemy • 2022

SQL & Relational Databases | Codecademy & Udemy • 2022

VFX Artist Certification | VFX Artist Cert. • 2014
